

## Welcome Message From EMSL Analytical, Inc.

Thank you for your interest in EMSL about your potential formaldehyde issue. Regarding Formaldehyde bulk testing for off-gassing (laminated flooring and composite wood products), We have two testing methods available. We have our desiccator method and our small chamber study method; see below for the information and pricing on both methods:

**1) Small chamber formaldehyde test** by ASTM D6007-14 EMSL Modified- \$650/sample for results in 2 weeks, \$1300/sample for results in 1 week. (<http://www.astm.org/Standards/D6007.htm>). We will need a 2ft x 2ft square sample of the suspect material (no larger samples please), wrapped in plastic sheeting or a trash bag. and shipped to the lab with the attached paperwork. If the material is a different size when intact such as 1ft X 6in that is fine, just no dimensions exceeding 2ft.

**2) Desiccator method formaldehyde test** by ASTM 5582-14 EMSL Modified, \$318/sample for results in 2 weeks, \$397/sample for results in 1 week. Quicker results are available and the prices listed on the attached paperwork. (<http://www.astm.org/Standards/D5582.htm>). We will need a 2in x 2in sample of the suspect material, or as close as possible to that size placed in a zip lock style bag and shipped to the lab with the attached paperwork.

**3) Monitoring Badge:** If you are interested in testing the air in your home for formaldehyde levels, we can help you do that with a formaldehyde monitoring badge that we can analyze by NIOSH Method 2016 Modified (<http://www.cdc.gov/niosh/docs/2003-154/pdfs/2016.pdf>). The badges are \$20 each and the analysis starts at \$150 for results in 2 weeks and \$190 for results in 1 week. Quicker results are available and the prices listed on the attached paperwork.

Attached is the paperwork to include when sending your sample. Please fill out the yellow, highlighted boxes. The address to the lab is at the top right. The second page has information about payment. Please contact me if I can be of any additional help.
